

Fishing Tips

Tips For The Serious Angler

Cut the herring at a 45 degree angle and with a 45 degree bevel

Insert the first hook through the inside of the cavity and back to the outside

Pull the hook and the leader through the herring and toward the back of the herring

The leader comes out of the herring at this point

Insert the second hook through the inside of the cavity, around the backbone and back out

The hook comes back out of the herring at this point

Cutplug Herring
