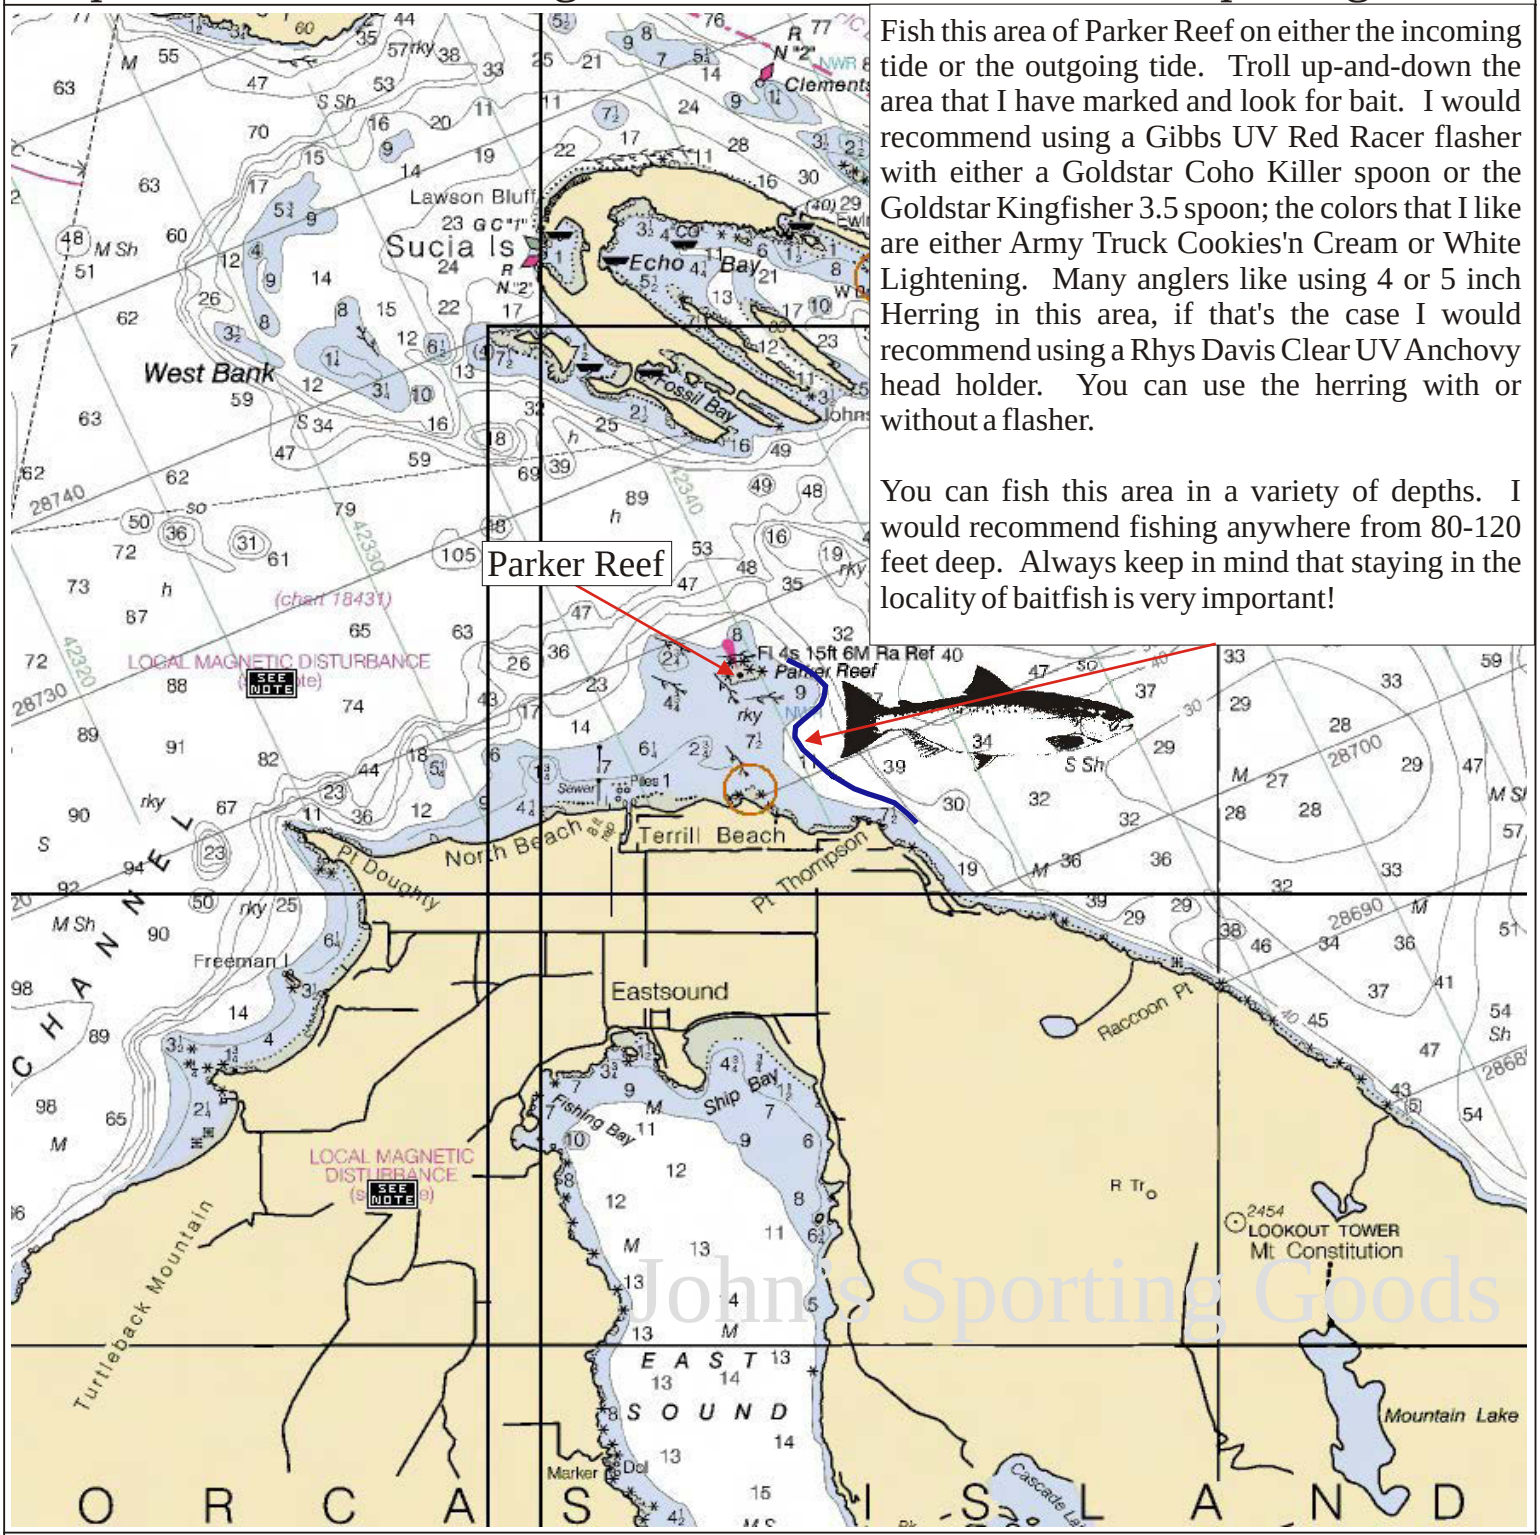
Fishing Maps

Maps For The Serious Angler — John's Sporting Goods



Fish this area of Parker Reef on either the incoming tide or the outgoing tide. Troll up-and-down the area that I have marked and look for bait. I would recommend using a Gibbs UV Red Racer flasher with either a Goldstar Coho Killer spoon or the Goldstar Kingfisher 3.5 spoon; the colors that I like are either Army Truck Cookies'n Cream or White Lightening. Many anglers like using 4 or 5 inch Herring in this area, if that's the case I would recommend using a Rhys Davis Clear UV Anchovy head holder. You can use the herring with or without a flasher.

You can fish this area in a variety of depths. I would recommend fishing anywhere from 80-120 feet deep. Always keep in mind that staying in the locality of baitfish is very important!
